What's new for your ears?

Greetings!

The 4th quarter is among us. Audiotion is proud to offer some new items that will help differentiate you from your competition.

First is the new Oracle SI-1000 integrated amp. After 18 months in design, it is ready. Next is the new Aurum Cantus speakers. This will have limited availability through a small set of quality dealers. Also, the unsung hit of AudioFest is the Acoustic Zen Adagio.

Oracle SI-1000 Integrated Amp

I am very pleased to announce that the new Oracle SI-1000 integrated amplifier is now shipping. Never mind that it looks beautiful. Never mind that it is built like a tank. If you are looking for a quality product that will bring out the detail in your music, this amplifier is for you! And you thought Oracle only made turntables.

This is a full-function, dual-mono, solid-state integrated amplifier design boasting a clean 175 wpc. The SI-1000 supports 4 sets of RCA inputs, 1 set of XLR inputs, STN ratio of 97dB! And all this in a remote controlled, brushed aluminum chassis.

Aurum Cantus V3M

The first shipment of Aurum Cantus is in! AC will only be sold through a limited number of high-end dealers. The entire lineup will include 3 bookshelf speakers and 2 floorstanders. The Aurum Cantus V3M is a reference grade bookshelf speaker. This is

one of the most coherent speakers I've ever hear. It is finished in high-gloss rosewood and supports a ribbon tweeter. The build quality is over the top. Aurum Cantus is imported by VAS Audio, the same folks that import the Cayin line of tube electronics.

Louis of The Stereo Shop said this after receiving the V3M "Hi Rusty-got the V3M's today and even out of the box they are sounding superb. Can't wait till they break in. It's SUPERB!!!!"

Tim Stinson of Sound & Image Design sent me an email describing his reaction. "I am so pleased that Steve plopped me in front of the Aurum Cantus to kill time while conducting business. He was using the insanely inexpensive Cayin A-50T 50 watt and the sound took me into the upper stratosphere of musical nirvana. I recall listening to about 2 minutes of Mary Black's COLUMBUS and being enamored with the clarity and coherence in the midrange. The stage depth was also ridiculously impressive. I followed this brief period of musical bliss with about 2 minutes of ANOTHER TRAIN by Harmonytrix. I realized they provided incredible width to the soundstage as well to compliment the already fantastic depth."

Usher BE Series - The hit at AudioFest in Denver!

Pictured is the new Usher Dancer BE-10 reference floor stander. The BE-10 is the smaller of the two Beryllium models, sporting both a BE tweeter AND midrange. These are one of the most incredible values in high-end audio. The Dancer Series has 4 models.

MusikMatters (formerly Thee High End) is the importer of Usher and has a mission of bringing "Amazing Sound - Surprising Value" to market. Usher loudspeakers offer performance that is comparable to loudspeakers two to three times the price. If you are a high-value dealer looking for a differentiator product, Usher rules.

Acoustic Zen Adagio

Robert Lee of Acoustic Zen mated his Adagio speakers with ModWrite electronics to provide an sweet demo room at AudioFest. The Adagio will prove to be a big hit. Now if Robert can find the password to his web site and post the speakers...
