

# Introduction of Xindak hybrid amplifier XA6900(2011 Version)

(Engineering Prototype)

Released in September, 2011

## *Introduction*

Our Xindak have finished researching a new stereo hybrid integrated amplifier named XA6900 (2011 Version), which integrates the characteristics for both solid-state amplifier and vacuum tube amplifier.

The main feature about the product is as follows.

The preamplifier stages of the amplifiers use Vacuum tube, while each channel of the power amplifier stage is with 2 pair of Toshiba 2SA1943/2SC5200 power transistor.

The power supply part is two 230W Toroidal transformers, power reservation is quite of adequacy.

This product supports remote control, which is easy for users' operation.

Red LED information display window.

## *Specifications*

Rated Output Power: 100W/8 ohms

Inputs: 3 RCA, 1 XLR

Outputs: 2 Binding posts

SNR: >90dB

Frequency Response: 10Hz-100KHz

Net Weight: 14.5Kg
